

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the City of Salem. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2003.

Residents of the City of Salem

Characteristics of Admissions

In FY 2003, there were 115,896 admissions to licensed substance abuse treatment services in all of Massachusetts; 0.5% (627) of these admissions reside in the City of Salem. 4.1% (26) of admissions from the City of Salem were under 18 years of age.

Please note that these statistics represent only admissions, and can represent a figure larger than the actual number of individuals. In FY 2003, admissions to all residential and outpatient substance abuse treatment services from the City of Salem reported the following characteristics:

- 68.5% (430) were male and 31.4% (197) were female.
- 59.9% (376) were between the ages of 21-39.
- 82.6% (518) were white non-Latino, 3.8% (24) were black non-Latino, 9% (57) were Latino, and 4.4% (28) were other racial categories.
- 69.8% (438) were never married, 10.6% (67) were married, and 19.4% (122) reported not to be married now.
- 32.5% (204) had less than high school education, 45.9% (288) completed high school, and 21.5% (135) had more than high school education.
- 30.9% (194) were employed.
- 8.5% (53) were homeless.
- 32.7% (205) had prior mental health treatment.

Primary Substance of Use

At admission clients identify a “primary drug” of use which is the substance currently causing them the most problems. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the City of Salem.

Table 1					
Primary Drug by District and State FY 2003					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
City	46%	34%	8%	4%	1%
State	43%	38%	6%	4%	4%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Number of admissions Reporting Substance Used: FY 1995 – FY 2003							
City of Salem							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '96	560	450	177	162	106	124	87
FY '97	564	466	189	149	103	130	100
FY '98	585	464	213	191	82	150	113
FY '99	630	504	213	205	101	191	157
FY '00	748	571	249	192	91	181	151
FY '01	680	534	206	182	64	214	156
FY '02	782	587	270	219	80	211	126
FY '03	627	412	170	137	48	235	166

Heroin and Injection Drug Use

Figure 1 below shows the proportional increases in all admissions in the City of Salem and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
